

**Abstract**

The present invention provides for pharmaceutical compositions that includes a triterpene (e.g., betulin) and an essential oil (Vicks® Vapor Rub). The present invention also provides for a cosmetic formulation that includes a triterpene (e.g., betulin) and an essential oil (Vicks® Vapor Rub). The present invention also provides a method of treating a fungal infection that includes administering (e.g., topically applying) an effective amount of the pharmaceutical composition to the tissue afflicted with the fungal infection, or the tissue at risk of being afflicted with the fungal infection.
